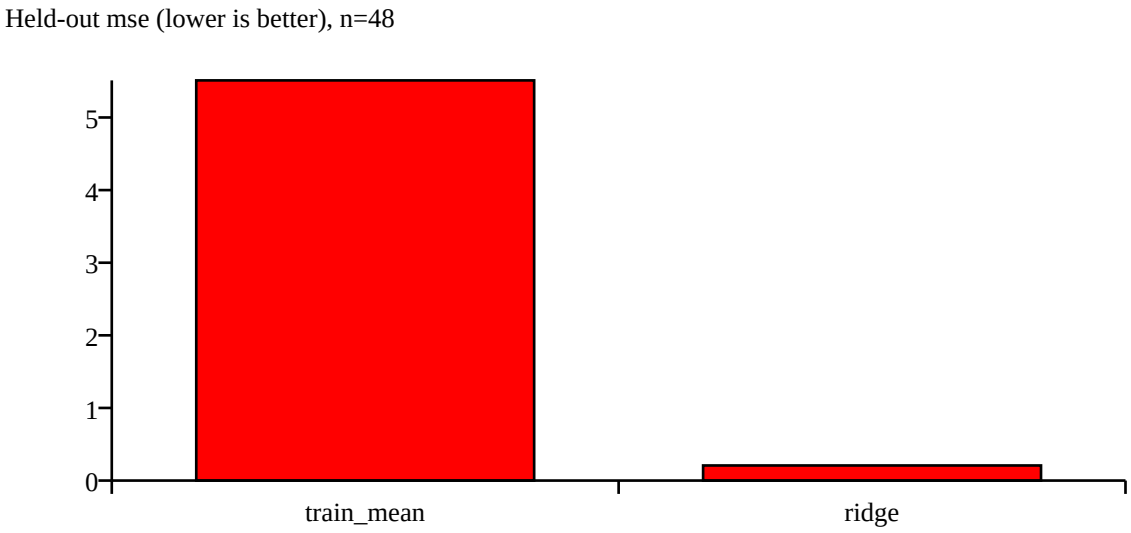
ridge.rmse	0.45582172



Chronology does not establish feature availability; inspect provenance.
Final holdout is evaluated once by this run; repeated tuning can overfit it.

What this means

The table contains observed values from this saved run, with no invented performance estimates. Values from different metrics have different units and must not be ranked together. Synthetic comparisons demonstrate implementation and sensitivity; they do not demonstrate trading edge.

Limitations and next test

Official runtime, API, scoring and dependencies must still be checked. Use the official evaluator and legal data, compare paired seeds, and inspect worst cases. A mock fill model can materially change the ranking of strategies.
